Candidate Discussion and Debate

Come meet the candidates for the 2013 Election and get your questions answered at the Ephraim City Council Chambers, Wednesday, October 23rd at 6:00 p.m.

Richard Squire and Jack Keisel are the candidates for Mayor, with Alma Lund, Elaine Reid, Rosie Connor, and Margie Anderson running for Council.

Election Day
November 5th

Ephraim City Municipal Elections will be held November 5th at the Senior Center at 85 W 100 N. Polls will open from 7:00 a.m. to 8:00 p.m. on that day.

Early Voting will take place at the Ephraim City Offices from Oct 22—Nov 1 during regular business hours.

Star Reading Program Volunteers Needed

Ephraim Elementary School needs volunteers to help with the STAR Reading Program.

If you can volunteer just one hour, once a week, you can help two students become better readers.

If you can help us, please call Kerry or Jeanie at Ephraim Elementary, 283-4171, or come by the school and volunteer!
Within the last four years Ephraim City has invested roughly nine million dollars in updating our infrastructure for better reliability and in preparing our systems and facilities for future growth and usage. Of the nine million invested, we worked diligently to secure grants that covered roughly five million of the total investment.

WATER
Replaced several miles of eighty year old water line carrying water down Ephraim Canyon, purchased enough water rights to provide for roughly 400 new homes, constructed a new 1.5 million gallon water tank for additional storage capacity, and replaced an old leaking water line running beneath Center Street. Planning preliminary studies into constructing a new culinary well.

WASTE WATER
Completed a 20 year master plan for our City sewer facilities. Purchased land for the future expansion of our waste water lagoons, will be beginning construction of a new 18 acre lagoon and treatment facilities to enable the ability to discharge treated water.

POWER
constructed a new substation, restored and updated hydro generation facilities with new turbines and water intake pipelines, constructed new power lines, and installed a master breaker box helping to protect our city power system from surges that come from outside of the city.

AIRPORT
Installed an automated weather operation system (AWOS), in the next eighteen months will be resurfacing the runway, extending the runway within the current boundaries, installing an instrument approach (allows pilots to land in cloud coverage), constructing a pilots lounge, and installing aviation fuel.

ROADS
Completed hundreds of thousands of dollars of road way repairs and overlays. Constructed over a half mile of new or repaired sidewalks along main street and elsewhere. Will be completing a main street beautification project between 100 South and 100 North which will include new sidewalk, new lights, planter boxes, and other improvements.

STORM DRAINAGE
Repaired critical sections of waterways and diversions that had been damaged from previous high water events. Dredged out settling basin above town to help catch debris and protect against flooding that occurs when debris from the mountains gets plugged up in our culverts.

PARK
Plans underway to continue phase 2 of the Canyon View Park, to include a new amphitheater, splash pad, and sand volleyball courts, all expected to be complete by the end of next year.

Ephraim City Infrastructure Improvements

SENIOR CENTER
