

**Ephraim City Utilities customers  
can put money in their pockets with**

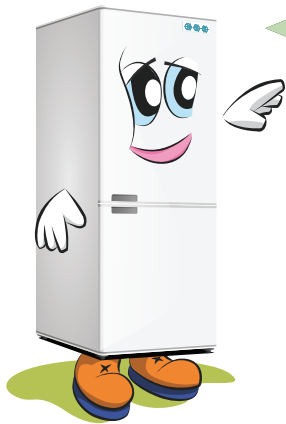

## Energy Efficiency Rebate Programs

**You can reduce your energy use, electricity bill,  
help the environment and  
upgrade to more efficient equipment.**

### Home Energy Saving Program - Lighting Fixtures

Energy efficient light fixtures reduce energy use by providing savings year after year. Many lighting fixtures are designed for energy efficient compact fluorescent light bulbs (CFLs) and light-emitting diodes (LEDs), providing additional savings on replacement light bulbs.

If you are remodeling consider installing qualified lighting fixtures, (limit 5 per customer on existing homes) it is a simple way to save energy and money.

### See "Ya" Later Refrigerator Program

If you have an old refrigerator or freezer in your garage or basement, taking up space and using up energy, you can now say "See Ya' Later Refrigerator" and earn a \$30 cash incentive.

Older refrigerators and freezers, especially when used as second units and stored in hot garages, can be huge energy hogs. By discontinuing use of inefficient models, customers can get cash back, decrease your electricity bill, and help the environment.
